

BYPASS GOLD

Audi • Seat • Skoda • Volkswagen

30 SECONDS TO IMMO OFF IN VAG GROUP CARS

World-famous device allowing you to permanently remove immobiliser through OBD2 plug.

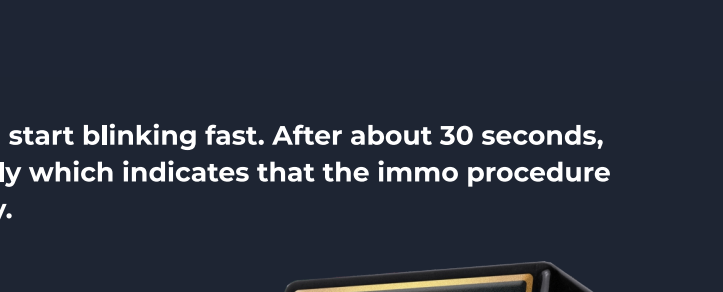

Automatically remove immo through OBD2 plug in VAG group cars:

AUDI, SEAT, SKODA, VOLKSWAGEN

Bypass is the only device in the world that can remove immo from different types of VAG ECUs automatically. No additional settings necessary. Just turn ignition and plug it into OBD. In a few seconds, immobiliser will be removed.

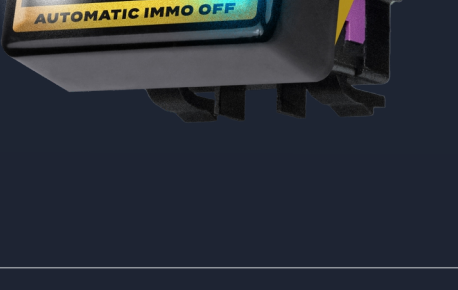

How it works

1. Turn ignition ON and wait 20 seconds

2. Connect Bypass Gold to OBD2

3. Once connected, blue LED will start blinking fast. After about 30 seconds, the blue LED starts to blink slowly which indicates that the immo procedure has been completed successfully.

4. Turn ignition OFF and disconnect the device

BOSCH EDC16
